---> Comment Text :

1 President Bush appears poised to approve Nevada's Yucca Mountain as a storage site for high-level nuclear waste, even though the region is earthquake-prone. This makes no sense whatsoever! In addition, water flows beneath the mountain, so it could not only infiltrate the waste containers, but also corrode them and carry radioactive waste into the groundwater.

We strongly oppose the plan and wish to make that known before Energy Secretary Spence Abraham makes his recommendation to

President Bush.

More than 60 million Americans live in 43 cities along nuclear waste transportation routes. It is vital that we get the message out, loud and clear, that the government must scrap the

Yucca Mountain proposal!

Please consider these as our official comments on this vital issue.
